This listing of claims will replace all prior versions and listings of claims in the Application.

<u>LISTING OF CLAIMS:</u>

1.   (***Currently Amended***) A system for generating an active voice page that provides at

least one interactive and real-time voice service to at least one user ~~and includes at least one~~

~~parameter set by the at least one user as a trigger condition~~, the active voice page comprising

at least one markup language document, the system comprising:

a subscription interface that enables ~~the~~ at least one user to subscribe to ~~the~~ at least one

voice service <u>that is executed upon satisfaction of a predetermined condition to output</u>

<u>personalized information to the at least one user</u>, wherein ~~each~~ <u>the at least one</u> user specifies

~~at least personalized content associated with the at least one voice service~~ <u>preferences for the</u>

<u>content and presentation of information to be output by the at least one voice service</u>;

an input module that receives data reports and a structure for the at least one voice

service <u>when the at least one voice service is executed</u> ;

~~a monitoring module that determines whether the at least one parameter has been~~

~~satisfied;~~

a markup language converting module that converts the data reports and the structure

into a markup language;

a blending module for blending the converted data reports and the converted structure

into the active voice page; ~~and~~

<u>a module for generating a call request that receives the active voice page and one or</u>

<u>more style properties that are unique to the at least one user and generates a call request for</u>

<u>the at least one user; and</u>

~~a communication module that enables the at least one voice service to initiate a communication session with the at least one user when the at least one parameter is satisfied, wherein the communication module is adapted to convey the personalized content to the at least one user and to enable the at least one user to respond to the at least one voice service.~~

<u>a call server for placing an outbound telephone call to a voice-enabled terminal device of the at least one user to initiate an interactive voice broadcast with the at least one user, wherein information personalized for the at least one user is presented to the at least one user from the active voice page during the interactive voice broadcast, and wherein the active voice page further comprises one or more user inputs that enable the at least one user to respond to the personalized information during the interactive voice broadcast.</u>

2.   (*Original*) The system of claim 1, wherein the markup language is extensible markup language.

3.   (*Original*) The system of claim 1, wherein the markup language is TML.

4.   (*Currently Amended*) The system of claim 1, wherein the data reports ~~are~~ <u>comprise</u> online analytical processing <u>(OLAP)</u> system reports.

5.   (*Previously Presented*) The system of claim 1, wherein the markup language

converting module comprises a markup language generator that receives the structure and

generates the at least one markup language document from the structure.

.6.   (*Previously Presented*) The system of claim 1, wherein the markup language

converting module comprises a markup language transforming module that receives the data

reports from the input module and transforms the data reports into the at least one markup

language document.

.7.   (*Previously Presented*) The system of claim 6, wherein the markup language

transforming module receives stylesheets from the input module and transforms the data

reports into the at least one markup language document using the stylesheets.

8.   (*Currently Amended*) The system of claim 1, <u>wherein the predetermined condition</u>

<u>comprises either a scheduled event or a triggering event, and is specified by the at least one</u>

<u>user while subscribing to the at least one voice service</u> ~~further comprising a module for~~

~~generating a call request that receives the active voice page and one or more style properties~~

~~that are unique to the at least one user and generates a call request for the at least one user.~~

9.   (*Currently Amended*) A method for generating an active voice page that provides at

least one interactive and real-time voice service to at least one user ~~and includes at least one~~

~~parameter set by the at least one user as a trigger condition~~, the active voice page comprising

at least one markup language document, the method comprising:

enabling ~~the~~ at least one user to subscribe to at least one voice service <u>that is executed</u>

<u>upon satisfaction of a predetermined condition to output personalized information to the at</u>

<u>least one user</u>, wherein ~~each~~ <u>the at least one</u> user specifies ~~at least personalized content~~

~~associated with the at least one voice service~~ <u>preferences for the content and presentation of</u>

<u>information to be output by the at least one voice service</u>;

receiving data reports and a structure for the at least one voice service <u>when the at</u>

<u>least one voice service is executed</u>;

~~determining whether the at least one parameter has been satisfied;~~

converting the data reports and the structure into a markup language;

blending the converted data reports and the converted structure into the active voice

page;

<u>generating a call request for the at least one user from the active voice page and one or</u>

<u>more style properties that are unique to that at least one user;</u>

~~enabling the at least one voice service to initiate a communication session with the at~~

~~least one user when the at least one parameter is satisfied;~~

~~communicating the personalized content to the at least one user; and~~

~~enabling the at least one user to respond to at least one voice service.~~

<u>placing an outbound telephone call to a voice-enabled terminal device of the at least</u>

<u>one user to initiate an interactive voice broadcast with the at least one user, wherein</u>

<u>information personalized for the at least one user is presented to the at least one user from the</u>

<u>active voice page during the interactive voice broadcast, and wherein the active voice page</u>

<u>further comprises one or more user inputs that enable the at least one user to respond to the</u>

<u>personalized information during the interactive voice broadcast.</u>

10. (***Original***) The method of claim 9, wherein the markup language is extensible markup

language.

11. (***Original***) The method of claim 9, wherein the markup language is TML.

12. (***Currently Amended***) The method of claim 9, wherein the data reports ~~are~~ <u>comprise</u>

online analytical processing <u>(OLAP)</u> system reports.

13. (***Currently Amended***) The method of claim 9, wherein converting comprises receiving

the structure and generating <u>the</u> at least one markup language document from the structure.

14. (***Previously Presented***) The method of claim 9, wherein converting comprises

receiving data reports and transforming the data reports into the at least one markup

language document.
